

IN THE CLAIMS

Please amend claim 15 as follows:

15. (AMENDED) A method of inserting a circuit integration module into an avionics cabinet, the method comprising the steps of:
aligning said module to a guide on said avionics cabinet;
inserting said module into said avionics cabinet along said guides; and
securing said module in said avionics cabinet in order to provide an electrical interface between said module and said avionics cabinet.

REMARKS

This communication is responsive to the Office Action dated February 1, 2001. Claim 15 has been amended. Attached is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "**Version With Markings To Show Changes Made**". Claims 6-20 (2 independent and 13 dependent) remain pending in this Application. Support for the amendments is found in the Specification and claims originally filed. No new matter is added by this Amendment.

Drawings

The Office objected to the drawings under 37 C.F.R. § 1.83(a) alleging that the ventilation holes must be shown in the drawings. Applicant refers to Figure 3 of the present application illustrating ventilation holes 366. Ventilation holes 366 are further described in the present application, *inter alia*, page 8, lines 11-21. Thus, Applicant respectfully requests withdrawal of this objection.

Specification

The Office indicated that the spacing of the lines of the Specification makes reading and entry of amendments difficult. Applicant submits that new application papers with lines double spaced on good quality paper were already submitted in the Response to Office Action filed
